

GuardianView 360

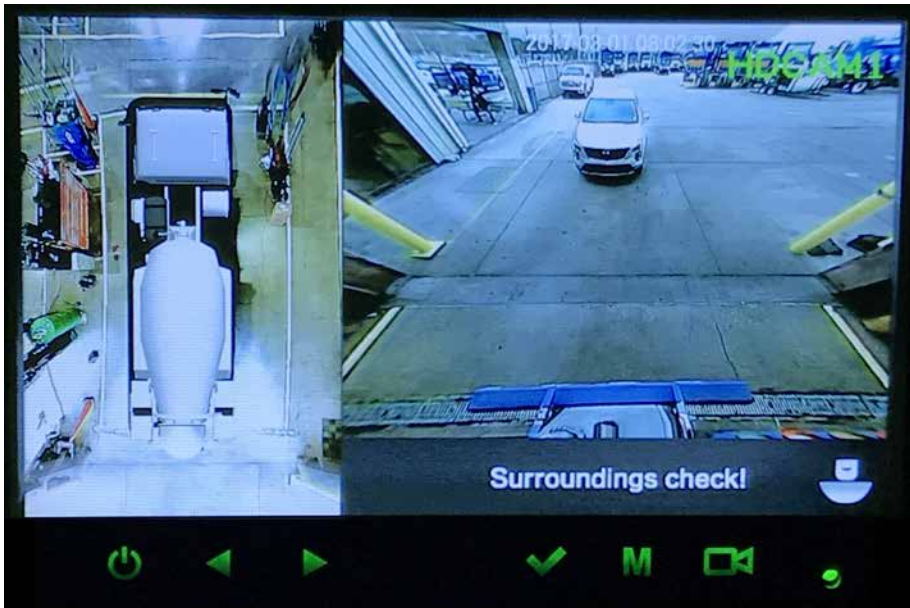

360° Camera Systems – The End of Blind Spots!

GuardianView 360 is like having a drone flying overhead and sending an image to your vehicle's dashboard.

- No more looking mirror to mirror
- No more checking blind spots
- No more thinking one glance is enough
- Built-in video recording
- Trigger activated recording
- Reduce fraudulent claims

Drivers can look at a dash monitor to see everything within a few feet of the vehicle. That's 360 degrees of visibility presented from a bird's-eye perspective above the vehicle!

GuardianView 360

- Built-in video recording
- 720P live-video incident recording (ideal for court cases and insurance claims)
- Easily integrates with full HD in-cab monitors
- Manually transfer measurements for easy calibration across multiple vehicles with standard dimensions
- Trigger-activated perspective shifts to see more detail on either side or behind the vehicle.
- Proven technology to improve safety and reduce fraudulent claims.

GuardianView 360 renders feeds from 4 fish-eye HD cameras—one on each side of the vehicle—into a seamless composite image spanning 360 degrees. It's like having a guardian in the sky showing you all the dangers to look out for. That's why we call it GuardianView 360. **Contact Wastebuilt to learn more.**
